The main image shows a close-up of a cable coating process. A large, dark, cylindrical object, likely a cable, is being coated with a dark, textured material. The coating is applied in a series of parallel, slightly overlapping bands. The background shows industrial machinery, including a large metal roller and a white cylindrical component. The lighting is bright, highlighting the texture of the coating and the metallic surfaces.

A small icon representing a PDF document. It features a red banner with the text "PDF" in white, a red Adobe logo, and the word "Adobe" in black below it.

The image shows a screenshot of an Adobe Reader window displaying a PDF document. The document content is a photograph of a cable coating process. The photograph shows a long, narrow metal frame structure with several parallel cables running through it. The cables are being coated with a dark material. The background is a corrugated metal wall. The Adobe Reader interface includes a menu bar (File, Edit, View, Document, Tools, Window, Help), a toolbar with navigation and search icons, and a status bar at the bottom showing the page number (2 / 9), zoom level (28.6%), and a search field. The Windows taskbar is visible at the bottom of the screen, showing the Start button, several open applications, and the system tray with the time 7:39 PM. A PDF icon is overlaid on the bottom right of the document image.

Cable Coating Benefits

- The important advantages of polyurea spray coatings are their reactivity, water insensitivity, low temperature curing and their unique physical and chemical properties.
- Restores cable to nearly new condition
- Extended Cable Life
- 10 year warranty
- Improvement to system reliability
- Reduce possibility of equipment failure from water migration
